

DR. STEVE HAUSMAN
CAN HELP YOU TO
UNDERSTAND THE
WORLD OF
TOMORROW

Enlightening Technology....

It has been said of the world today that “the only constant is change.”

Building on over thirty years of experience at the world-renowned National Institutes of Health, Dr. Steve Hausman can help you to comprehend the latest concepts in science and technology by describing innovations in clear and understandable language.

Drawing from a vast repertoire of movies, images and news articles Steve can create presentations that highlight the most recent developments in nanotechnology, bionics and human enhancement, 3D printing, robotics, aging, biometrics, radio frequency identification (RFID) and much more....

Dr. Hausman’s presentations are tailored to the individual needs of each client, taking into account the most recent developments in the relevant subject matter area(s). There are no “canned” lectures or keynotes.

The first step in scheduling a presentation is to contact him to discuss how the goals you have in mind for the presentation can be achieved.

Sample video clips are available on Dr. Hausman’s website under the Media tab.

He looks forward to working with you and your organization.

RECENT LECTURE TITLES

- **Nanotechnology: The Very Small Looms Very Large**
- **Biometrics: The Science of Being You**
- **The Bionic Human - No Need to Wait**
- **Emerging Technologies: Where will you be skating?**
- **Power Wheels: The History and Future of the Electric Vehicle**
- **Aging and the Prospect of a 200 Year Lifespan**
- **The Home of the Future is Here Now**
- **Replacing Humans: The Robotic Revolution**
- **Make it Yourself: The 3D Printing Revolution**
- **Home Automation and Zero Energy Houses**
- **Due Diligence and Emerging Technologies**

Dr. Steve Hausman is an exciting speaker with the ability to explain complex concepts of emerging technologies to both lay and professional audiences in an entertaining style. He founded Hausman Technology Consulting in 2007 after a 31 year career at the world-renowned National Institutes of Health (NIH) in Bethesda, Maryland where he was a researcher, administrator and senior executive. He holds a Ph.D. from the University of Pennsylvania in the field of transplantation biology. Among his many honors are the NIH Director's Award (the highest NIH award) and the Public Health Service Exceptional Achievement Award.

Steve's presentations are clear, understandable, fast-paced and filled with images, movies, illustrative quotes and news articles. His years of experience in science, technology and ethics enable him to use concrete examples to engage his audiences. He is as comfortable presenting keynotes in large auditoriums as he is speaking to investment managers in small conference rooms.

Listen to Steve's interview by Bill Frank at Radio Station KKZZ in Venture California (1400KKZZ.com) on the subject of nanotechnology, read blog entries and see video clips by clicking the Media tab at www.HausmanTech.com

TESTIMONIALS

- **"Your mastery of the information coupled with the exciting visuals made this a totally engaging experience..."**
- **"You opened a door to the future that is truly exhilarating."**
- **"My expectations did not even come close to what you shared with us."**
- **You "showed us a glimpse of the future that will come sooner than later."**
- **"Keep doing what you are doing!"**
- **Your lecture was "presented in a very interest-catching style by someone that is truly passionate about what he does!"**
